

Component 1: The Floor

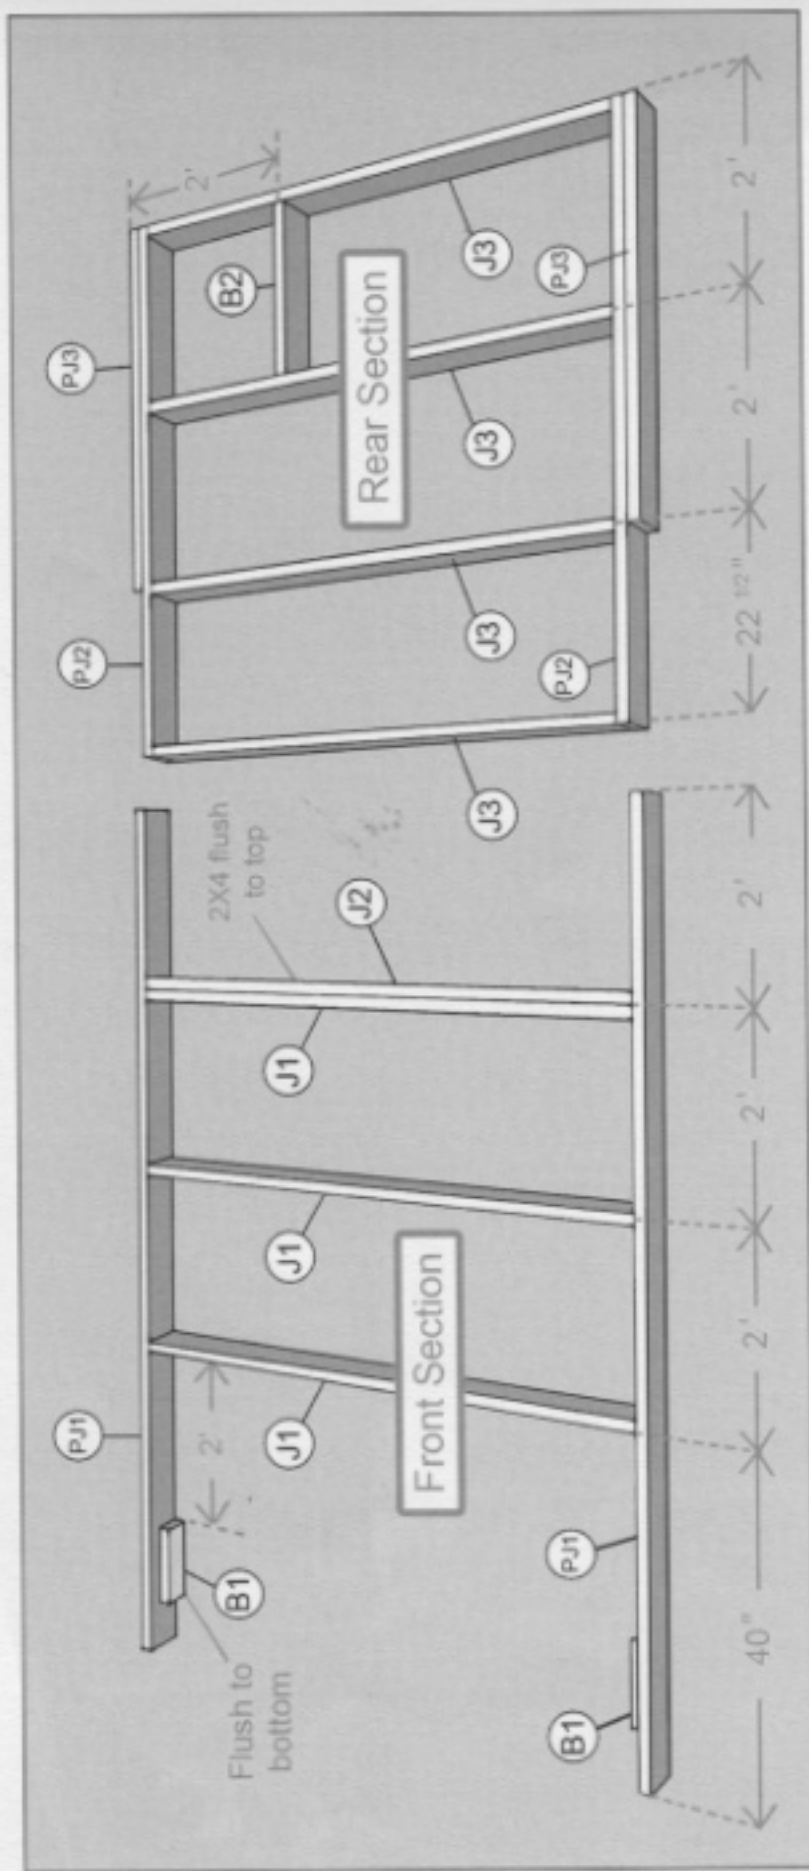

Figure 1. (Top view) Framing guide for floor sections

As **Figure 1** shows, the floor component is made of two separate sections so it can be moved by two or three people. Otherwise it's too heavy. The two sections interlock later when the Hut is assembled (see page 43).

The floor framing is covered with a flooring made of $\frac{3}{4}$ " plywood, cut from two full 4'X8' sheets.

Measurements for floor framing

Name	Material	Length	QTY/Floor
PJ1 -	2X6	112"	2
PJ2 -	2X6	70 $\frac{1}{2}$ "	2
PJ3 -	2X6	48"	2
J1 -	2X6	69"	3
J2 -	2X4	69"	1
J3 -	2X6	65 $\frac{7}{8}$ "	4
B1 -	2X4	10"	2
B2 -	2X6	21 $\frac{3}{4}$ "	1
